# THE TINYBOX THINK TANK

## FOR INNOVATORS & CHANGEMAKERS

The TinyBox Think Tank is a corporate-sponsored executive event, hosted and moderated by experts with a group of peers who want to discuss changes in leadership, emerging technologies, and global challenges. In the think tank, you can discuss your ideas with leaders from across the globe to share your knowledge, gain unique insight and develop solutions for the future.

# THE THINK TANK

TinyBox will kick start the process by delivering the tools you need to build and increase innovation. Understand how your industry is changing and find new untapped market opportunities with a TinyBox Think Tank.

Hosting your think tank includes the preparation and hosting of a four-hour session with our experts and your peers. The collaboration helps you develop your ideas and accelerate progress forward faster! And with the insights you gain from the rich discussion you can:

- ▶ **Increase visibility** through event promotion, with event materials and a coordinated communication strategy to increase lead generation
- ▶ **Establish further credibility** for your position as a thought leader in your industry with “blue-sky” ideation and innovation
- ▶ **Gain valuable insights** from competitors, collaboration partners, as well as potential clients to help you develop a clearer vision for your best future
- ▶ Create your own **source of unique, event-generated content** including quotes, data, and images to share for the coming year
- ▶ **Share the report** with clients and stakeholders, to further the conversation around trends revealed during your TinyBox Think Tank

Due to the calibre of our global C-level participants, each of our think tanks generates a comprehensive and insightful report for immediate actionability, therefore as a Think Tank Member, we help you maximize your visibility and impact.

**TINYBOX** | IT'S ABOUT STRATEGY, NOT TECHNOLOGY.

TinyBox is a think tank for the adoption and implementation of emerging technologies. Our strategies create value by incorporating business strategy with technologies, people operations, and leadership development, to ensure client success well into the future.
